\*\*Law applies to power boats less than a length specified in the State law—length varies from less than 16 ft. to less than 29 ft. depending upon the State. Puerto Rico also reports mandatory PFD use ages 12 and under. \*\*\*\*Indiana Emergency Administrative Rule effective 2003 addresses concurrent waters and requires children under age 13 to wear PFDs; State only waters do not fall under this rule. Under the heading mandatory education, a number of states currently are CUA, CAAA, or CAA based on Board evaluation of responses; some CUA states are possibly moving ahead with mandatory education and category assignment may change, for example Hawaii and Arizona.
